EXPRESSIONS MEN AND MACHINE: “WELCOME TO THE WORLD WHERE THE DEVELOPER IS A USER”

Men have developed a machine(s) for making the task easy. The developer must had a thought in his mind that one assistant must be there who can perform complex calculations in fraction of second and still be accurate and precise in answer. So he developed may be a Computer!!!

As soon as the computer evolved, there are number of

concepts in the technology came on the roadway. Computer is kind of machine which takes input and gives output by following predefined set of instructions. That simply means the person who has developed a program to solve a specific problem, fed a particular set of predefined instructions into it. That simply says a machine is just a follower and can solve the

problem only by men given instructions.

A computer world now-a-days is proven that there are concepts based on what computer can predict the future of certain areas. Yes it's a world of data science where data mining is a technology which predicts the future by identifying the trends, patterns or

“ The one which is made by you is now making your world...!!! ”

behaviour of data. In data mining, only the data – variable are the input and the analysis is done by the machine and it gives reasonable answers.

The machine requires training and supervision. Of-course it cannot replace the human intelligence. But - How beautiful it is the one which is made by you is now making your world...!!!

EXPRESSIONS YOUTH AND PEER PRESSURE

Youth is the best phase of every human life. This phase of life brings in so many moments to enjoy like best memories with cousins, family, and extended family i.e., friends. This phase of our life is a growing phase where we get to learn more about real-life situations or incidents and their takeaways as well along with spending the most precious years with loved ones to the fullest.

Years back youth did not play this vital role towards their family and society nor were they seen active towards bringing up innovative ideas for uplifting the economy as are seen recently who are more engaged towards working for the economic development while taking into consideration all the areas.

Surely, this stands true but to our notice, human beings are social animals as one can form many relations further. Making

good friends and hanging out with them in school, colleges and even somewhere else is super fun but important is to choose the friend wisely.

Today's social environment is occupied with temptation and desire and nowadays the trend of having a large group of friends is the motto or the only desire the youth has physically and to achieve that they make even those people their friends whom they do not even know much, just to satisfy their big circle desire. It

is obvious that where there is a large group there are different habits and choices and that is nowhere a problem but if that habit is a bad habit that one person can either spoil the whole bunch or whole bunch can improve the one person and that totally depends upon the ethics they have and how long can they refrain themselves to try out those new things.

All this sums up peer pressure, which is nothing but a frequently used term to de-

scribe the influence of friends on the other members of the group or the teenagers at most.

Peer pressure among youngsters is quite common and its negative impact has also been seen especially when we talk about consuming alcohol or tobacco or smoking. But this peer pressure is not always a direct pressure from one friend to the other, sometimes it is like what one sees others doing and wishes to do the same to

get as cool as that one person is. So, peer pressure is active and passive where in active it is forceful or we can say direct from one person to the other and in passive it is not at all forceful but the inner feeling and sometimes ego to be cooler and more vibrant than other people around him/her makes them do the unthinkable. No doubt both the pressures are different but both can equally cause a person to get addicted to some products.

If seen peer pressure in the other way, i.e., in positive way then having a pressure for friends is good because some day that will force us to attend school or colleges and get good grades or it will force us to try something out of box like adventurous activities while on a trip and enjoy all the phases and angles of our life. Even sometimes, it will make you want to put in 100% efforts and reach your desired goal in no time.

Today's youth is smarter than the one's way back so, I wish to see an encouraging peer pressure among the youth flowing like water in the ocean.

EXPRESSIONS**SUMMER VACATION**

Summer vacation is a time that many people, particularly students, look forward to each year. It is a time to take a break from the demands of daily life and engage in activities that bring joy, relaxation, and new experiences. In this article, we will explore the benefits of summer vacation and some popular activities people enjoy.

Benefits of Summer Vacation

Summer vacation offers numerous benefits to individuals of all ages. For students, it provides a much-needed break from the rigors of schoolwork and allows them to recharge their batteries before the new academic year begins. For adults, summer vacation offers a chance to take a break from work, spend time with family and

friends, and engage in leisure activities that are not possible during the rest of the year.

Summer vacation also provides an opportunity for personal growth and development. By engaging in new activities and exploring new places, individuals can broaden their horizons, learn new

skills, and gain new perspectives on the world. This can be particularly beneficial for children, who can use summer vacation to explore their interests, develop their talents, and discover new hobbies.

Popular Summer Vacation Activities

People enjoy many activities during summer vacation, depending on their interests and prefer-

ences. Some of the most popular summer vacation activities include:

Traveling - Summer vacation is a great time to explore new destinations, whether it be a road trip across the country or a trip abroad to experience new cultures.

Outdoor activities - Summer weather provides the perfect opportunity to engage in outdoor

activities such as hiking, camping, swimming, boating, and fishing.

Learning - Summer vacation can also be a time for learning new skills or taking classes to improve knowledge in a particular area of interest.

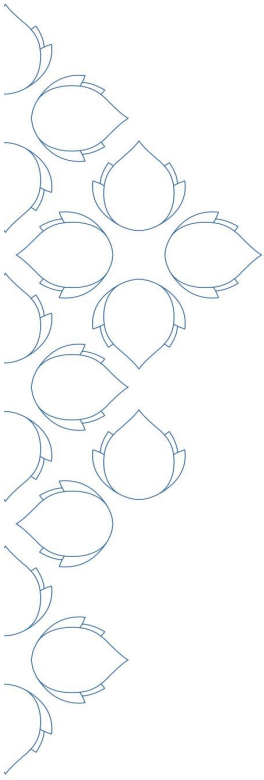

Volunteering - Many people use their summer vacation to give back to their communities by volunteering with local organizations or charities.

Relaxing - Sometimes the best way to spend summer vacation is simply to relax and unwind, whether it be reading a book, lounging by the pool, or spending time with loved ones.

ities, learning new skills, volunteering, or simply relaxing, summer vacation provides an opportunity to take a break from daily life, recharge, and gain new experiences. It is important to take advantage of this time and make the most of it by engaging in activities that bring joy, relaxation, and personal growth.

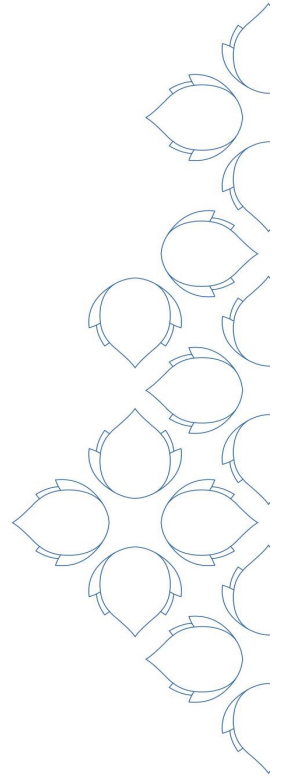

In conclusion, summer vacation offers numerous benefits to individuals of all ages. Whether it is traveling to new destinations, engaging in outdoor activ-
